

COURSE SYLLABUS

BACHELOR OF SCIENCE IN INFORMATION SYSTEMS (BSIS) IS STRATEGY, MANAGEMENT AND ACQUISITION

Year & Section	4th Year – Section E
Course	IS STRATEGY, MANAGEMENT AND ACQUISITION
Course Code	ISSMA413
Program	Bachelor of Science in Information Systems (BSIS)
Year & Section	4th Year – Section E
Course Type	Major / Professional Course
Suggested Term	As prescribed in the approved BSIS curriculum
Credit Units	3 Units
Prerequisite	As prescribed in the approved BSIS curriculum

I. Course Description

This course focuses on the strategic planning, management, and acquisition of information systems within organizations. Students examine how information systems support organizational goals and competitive strategies, including strategic alignment, information resources, IT governance, IT investment, sourcing and acquisition, vendor management, outsourcing, implementation, risk management, and performance evaluation. The course also develops students' ability to analyze IS decisions and recommend appropriate strategies based on organizational needs, resources, risks, and ethical considerations.

II. Course Learning Outcomes

ILO 1 Explain the role of information systems strategy in supporting organizational goals, competitive advantage, and business performance.

ILO 2 Analyze organizational, technological, and environmental factors that influence information systems strategic decisions.

ILO 3 Apply strategic planning tools and frameworks to evaluate information systems resources, capabilities, and investments.

ILO 4 Evaluate IS acquisition, sourcing, outsourcing, and vendor-management alternatives based on organizational requirements.

ILO 5 Assess risks, costs, benefits, governance requirements, and total cost of ownership associated with IS investments and acquisition decisions.

ILO 6 Recommend appropriate IS strategies and management actions using evidence, analysis, and ethical considerations.

ILO 7 Present and document an IS strategy or acquisition proposal that aligns technology decisions with organizational objectives.

III. Weekly Topics and Syllabus Mapping

Week	Topic / Lesson	Learning Activity	Assessment
1	Introduction to IS Strategy, Management and Acquisition	Discuss the role of IS strategy, management, and acquisition in organizations	Diagnostic activity / participation
2	The Information Systems Strategy Triangle	Analyze alignment among business strategy, organizational strategy, and IS strategy	Strategy triangle activity
3	Organizational and Competitive Strategy	Examine competitive advantage, business-level strategies, and the role of information systems	Case analysis
4	Strategic Analysis of Information Resources	Identify IS resources, capabilities, competencies, and sources of strategic value	IS resource analysis
5	IS Strategic Planning and Alignment	Develop strategic objectives and align IS initiatives with organizational goals	IS strategy exercise
6	IT Governance and Management	Examine governance structures, decision rights, policies, and accountability for IT	Governance activity
7	IT Investment and Valuing Information Systems	Analyze IT investment, benefits, costs, balanced scorecard, and total cost of ownership	IT investment analysis
8	Midterm Strategic IS Case Evaluation	Present and evaluate an organizational IS strategy case	Midterm case evaluation
9	IS Acquisition and Sourcing Strategies	Examine build, buy, subscribe, outsource, and other sourcing alternatives	Acquisition options analysis
10	Vendor Selection and Contract Management	Evaluate vendors using requirements, criteria, proposals, contracts, and service expectations	Vendor evaluation matrix
11	Outsourcing and IT Service Management	Analyze outsourcing models, benefits, risks, SLAs, and management considerations	Outsourcing case activity
12	IS Implementation, Change, and Risk Management	Examine implementation planning, organizational change, risk identification, and mitigation	Risk / implementation plan
13	IS Performance Measurement and Continuous Improvement	Apply KPIs, dashboards, benchmarking, and performance evaluation to IS management	IS performance dashboard
14	Ethical, Legal, Security, and Responsible IS Decisions	Consider privacy, security, compliance, ethics, and responsible use in strategic IS decisions	Ethics / risk checklist
15	IS Strategy and Acquisition Proposal Development	Prepare an evidence-based strategy or acquisition proposal aligned with organizational requirements	Draft proposal / consultation
16	Final IS Strategy and Acquisition Presentation	Present, defend, and explain the completed IS strategy or acquisition proposal	Final presentation / defense

IV. Learning Resources

- Course modules and instructor-provided materials
- IS strategy, management, governance, and acquisition references
- Strategic planning, IT investment, sourcing, outsourcing, and vendor-management resources
- Case studies and organizational IS strategy examples
- IT governance, risk, security, ethics, and performance-evaluation resources
- Institutional and course-specific project guidelines

V. Assessment Methods

Assessment Component	Weight
Case studies and strategic analysis activities	20%
IS strategy and acquisition exercises	20%
IT investment / vendor evaluation activities	15%
Strategy or acquisition proposal	25%
Documentation	10%
Final presentation and defense	10%
TOTAL	100%

VI. General Requirements

- Students are expected to participate actively in lectures, case discussions, consultations, and collaborative strategic analysis activities.
- Students must complete assigned analysis outputs and maintain appropriate project files and documentation.
- Students are expected to support recommendations with appropriate evidence, analysis, and organizational requirements.
- Students must observe academic integrity and properly acknowledge sources, frameworks, data, and other resources used.
- Use of AI-assisted tools must follow instructor and institutional guidelines, and students must be able to explain and defend submitted work.
- Final strategy or acquisition proposal and supporting documents must be submitted according to the instructor's approved schedule.

VII. References

- Course modules and instructor-provided materials.
- Official and reputable resources on information systems strategy, governance, acquisition, sourcing, and management.
- IS strategic planning, IT investment, vendor management, outsourcing, risk, and performance-management references.
- Selected academic articles, case studies, and reputable materials related to strategic information systems.
- Institutional guidelines and other resources identified by the instructor.
